Your grow guide
from Seedpirat.com

The Basics: Soil, water, light

Soil / Substrate

Loose, nutrient-rich

Optimal pH value: 6.0 – 6.5

Without good soil there is no rich harbor!

- Water / Pouring

pH 6.0 – 6.5 (for soil)

Note EC value

Don't drown – eat less often but eat your fill!

- Light

Growth: 18 hours light / 6 hours darkness

Flowering: 12/12

The sun never sleeps – things get serious in autumn!

Climate, Care & Protection

Climate

Temperature: 20 – 28 °C

- Humidity: 50–70%
(growth) · 40–50%
(flowering)
- Beware of mold on board!

- Care

Methods: LST, defoliation,

SCROG

- For the crew –
otherwise she does
what she wants!
- Pests

Classics: spider mites,
mold, fungus gnats

- Hygiene is the
strongest weapon
against pests!

Flowering, Harvesting & Storage

heyday

Usually 8 – 12 weeks (depending on variety)

The buds will tell you when it's time!

- Harvesting & Drying

18 – 20 °C · 50 % humidity

Duration: 10 – 14 days

Patience, sailor! Quickly harvested = scratchy.

- Curing & Storage

Airtight, dark, cool

Jars instead of bags – for full aroma!
